DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than payment of the issue fee.

2. This application is in condition for allowance except for the presence of claims 19, 21, and 22, non-elected without traverse. Accordingly, claims 19, 21, and 22 have been cancelled.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

The closest prior art, the admitted prior art as described in the background section of the specification on pages 1 and 2, discloses a manual method of maintaining an inventory record for inventory having various locations and performing a periodic manual inventory update to correct/reconcile any discrepancies in the inventory record as the accuracy of the record diminishes over time.

However, the admitted prior art fails to disclose, or fairly suggest, such a method being computer-implemented, and also fails to include or fairly suggest the substantive steps of:

removing outlier values from the data; averaging the remaining data values; using the calculated average as the adjustment amount when the current inventory data needs to be updated/adjusted/corrected due to a discrepancy in the count of items, as determined by an updated inventory assessment, rather than simply using the oldest/earliest value and using that value without regard as to whether or not the value was obviously erroneous; and, when a shortage exists for a re-use status for a product type and an excess of instances of in-service status exists for that product type, substituting the excess of instances of in-service status for the shortage of instances of the re-use status in the current central inventory record until the excess of in-service status is depleted or the shortage of the re-use status is eliminated.

Note that, though expressly included in the search for prior art, no U.S. or foreign patents, nor any non-patent literature were identified that could reasonably be considered sufficiently relevant or pertinent so as to be characterized and addressed as "closest prior art."

4. Any comments considered necessary by applicant must be submitted no later than payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. PLEASE TAKE NOTICE, that failure by the examiner to respond to any such statement commenting on reasons for allowance does not give rise to any implication. See 37 CFR § 1.104(e).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to the disclosure.

7. Any inquiry concerning this communication, or earlier communications, should be directed to the examiner, **Jerry O'Connor**, whose telephone number is **(571) 272-6787**, and whose facsimile number is **(571) 273-6787**.
